
DFUG 2003 WRAP-UP

Wayne Taylor
CDSI

DataFax 4 Suggestions

- **Retrieval Methods**
 - 3 Include text match searches in query by field
- **Right Click Fast Menu**
 - 3 include sign off via record status selection as in DF3
- **Patient Review**
 - 3 allow record selection by plate, visit, ALL

DataFax 4 Suggestions

- **QC Notes**
 - 3 When QC dialog appears show the oldest unresolved QC if there are multiple QCs.
 - 3 QC selection widget currently just shows the QC number. Add problem type & resolution status.
 - 3 Add previous/next buttons
 - 3 Add a field for edit check name
 - 3 Build a retrieval set by “linked fields”
 - QC type: refax, DCF, message, internal note
 - ☞ Make expected response time a QC attribute

DataFax 4 Suggestions

- **Bar Codes**
 - Support inter-leaf 2 of 5 as well as 3 of 9.
- **Landscape CRFs**
 - 3 Put bar code at top of long edge

DataFax 3.6 Suggestions

- **Validation Tool 1/4:**
 - 3 Display message "Skip aborted"
 - 3 Split: Horizontal, Data|CRF, CRF|Data
 - 3 Separate permissions for auto-resolution of missing and illegal QC notes.
 - 3 After a datafax retrieval file (.drf) is deleted do not jump to the top of the DRF dialog.
 - 3 Always update "current data value =" in QCs.

DataFax 3.6 Suggestions

- **Validation Tool 2/4:**
 - Add real time double data entry (DDE).
 - Add permissions as in DF lite 3.6.
 - Fix retrieval by QC report number.
 - When a QC note is deleted the field should not continue to show the QC blue or magenta color.
 - Currently all CRFs can be saved as PDF, add:
 - PDF from current CRF only.
 - PDF from CRFs selected in the record list.

DataFax 3.6 Suggestions

- Validation Tool 3/4:
 - Reason for data change:
 - Study level on/off switch
 - Force reason to be entered as user leaves the field
 - Add dfaddrreason() to edit check language
 - 3 Always require a reason when fix bar code is used to change: study#, plate#, visit#

DataFax 3.6 Suggestions

- Validation Tool 4/4:
 - Context sensitive study specific help:
 - Study level
 - Visit level
 - Plate level
 - Field level
 - Validation level

DataFax 3.6 Suggestions

- Reports 1/2:
 - 3 DF_SSschema fails to wrap long legal range specifications.
 - Allow 2+ external QC reports on the same day.
 - On QC reports flag those QCs that are new.

DataFax 3.6 Suggestions

- Reports 2/2:
 - New report listing entire visit schedule for each patient (as far out as possible).
 - New report that lists records with status dirty that have no unresolved QC notes.

DataFax 3.6 Suggestions

- **DFsetup:**
 - Add a view only permission.
 - In the visit map dialog show conditional plate and conditional termination maps.
 - Find&Replace for styles and edit checks; that works across all or specified studies.
 - In edit check dialog show editing options as buttons, not as right-click selections.

DataFax 3.6 Suggestions

- **DFsetup 2/2:**
 - Allow 30 choice field categories (current max=20).
 - Allow longer field descriptions (current max=25).
 - Separate permission for the centers database.
 - Audit trail of all study setup and permission changes.

DataFax 3.6 Suggestions

- **Studydir/work/errors:**
 - 3 Add year to the error log records.
- **DFpdf**
 - 3 Add support for creation of password protected PDF files.
- **DFaccess**
 - 3 The ability to enable read only mode and to return to read-write mode should be restricted to:
 - User datafax ?
 - Users with setup tool priviledges?

DataFax 3.6 Suggestions

- **DFrouter:**
 - Allow record skip and record release.
- **Edit Checks:**
 - `dfeditqc(datafield, QCfield, "new value")`
- **DFsas:**
 - Currently informat statements precede the data statements; move them after the data statements.

DataFax 3.6 Suggestions

- ICR
 - JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC
- DF lite
 - Get authentication from Citrix login
 - Allow users to update their system login password.
- QC tool
 - Allow users to define personal retrieval tasks, as in the validation tool.
